Adverse Events Report

“With the Adverse Events report we catch any typos or misconceptions and are able to fix them before they become problems. If they are real, we print all the information and have it on file. When the surveyors come we have done their work for them.”

Pat West, Administrator,
Pioneer Home Healthcare, Bishop, CA

Imagine reviewing Adverse Events immediately, pre-submission. Find errors and correct them before they become part of your agency’s on-line record. Investigate patient characteristics to determine who may be at risk. Have answers at the tip of your fingers when reviewers arrive.
